INTELLIGENCE UPDATE: Russia retains a significant military presence that can conduct an invasion without further warning.

Below demonstrates President Putin's possible axis of invasion. He still can choose to prevent conflict and preserve peace.

important.

He says he became increasingly convinced that Russia was about to launch its invasion in November last year. That was when he thought "this is going to happen", he recalls.

The week before the invasion, he took the highly unusual decision of publishing a map predicting Russia's likely invasion plans on Twitter. It was a decision he says wasn't easy, but he was convinced there was a need to get information out into the public domain.

"It's important to get the truth out before the lies come," he says.

south

- What weapons are being given to Ukraine by the UK?

He also defends the West's decision to highlight Russia's potential to use chemical and biological weapons.

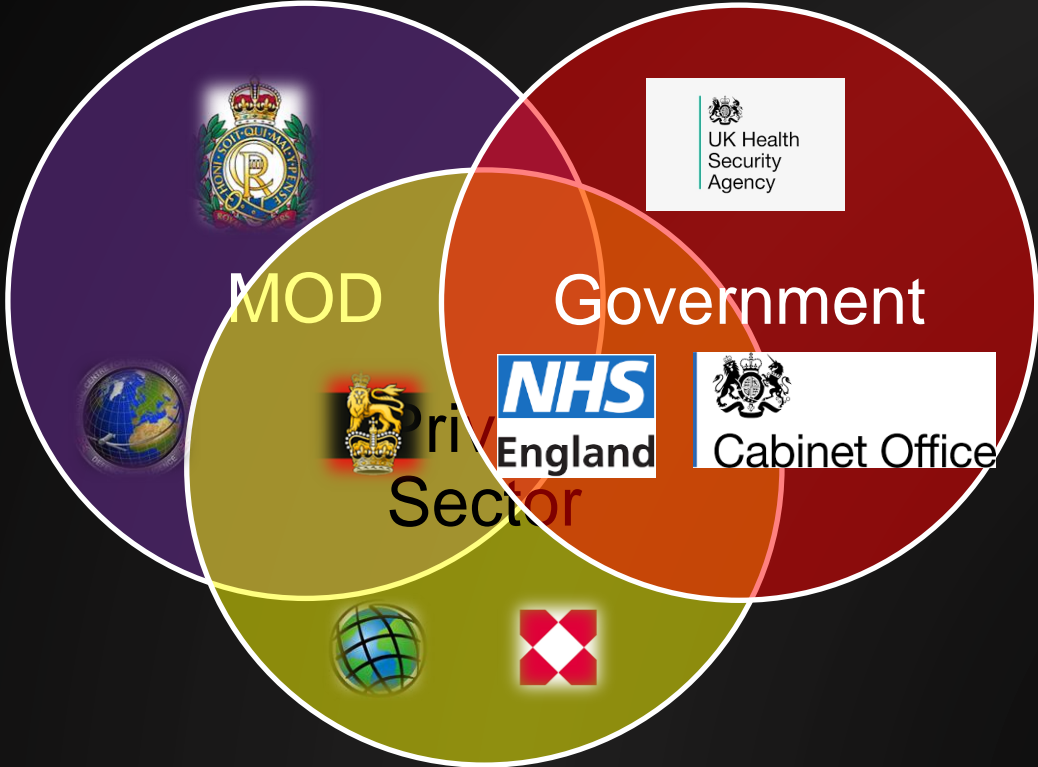

He believes it helped stop them from conducting so-called false flag operations to try and portray the Ukrainians or the West as being the instigators of the conflict.

Rarely has so much classified intelligence been shared with the public. Defence Intelligence has since been publishing daily updates throughout the war.
