Central Gov Al adoption project

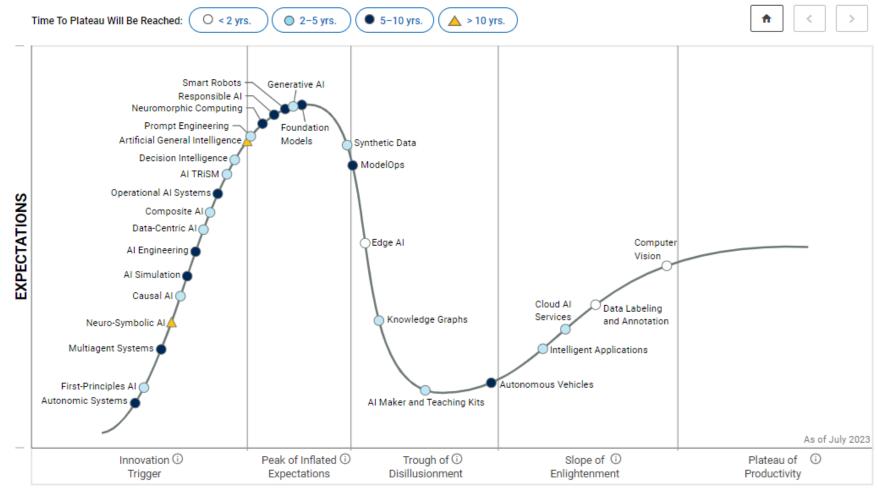

### Al market, key observations

"By 2024, 40% of enterprise applications will have embedded conversational AI, up from less than 5% in Gartner. 2020."

- emerging market products, suppliers and pricing not stable, heavy investment in building AI capabilities.
- content creation is the fastest growing use case likely to drive workplace and process productivity across enterprise tasks, such as writing bids, software development and marketing activities.
- strong digital maturity and data foundation required Al needs to be trained with complete data sets. Data governance & IPR is key to ensure security and valuable outputs.
- **skills shortage -** expertise in data & AI is sought after and in short supply, especially relating to ethics and security.
- supply chain supply v demand, concerns over future supply of Al chips to meet demand. Al is also being used to revolutionise supply chain management.
- data security & safety increased malicious use of Gen AI (eg deep fakes for social engineering & fraud), issues re discrimination & bias, and hallucinations

## Gartner Hype Cycle for Al

### **Gartner**

TIME

### **AI Market Size**

# Estimates of UK market size vary from £8.2bn to over £16bn

The Oxford Insights
'Government Al
Readiness Report' report
states that the
UK is ranked 3rd in the
world for Al preparedness
for innovation

The UK market can expect significant growth over the next 5 years, with a 14.3% compound annual growth rate (CAGR)

# Commercial challenges & considerations for the Public Sector

- **ethics** need to ensure <u>transparency</u>, <u>accountability</u> & <u>fairness</u> to prevent exacerbating biases, misuse & misinformation
- intellectual property (IP) needs to be protected for any AI software developed / bought for closed LLMs. AI hallucinations present risk consider IP infringement & indemnification
- privacy and data security compliance with GDPR, Data Protection
   & Digital Information Bill
- our rights & freedoms ensuring these aren't infringed by Al
- sustainability & social value processor power and data storage requires electricity, and this is growing exponentially
- vendor lock in enable ease of switching supplier in longer term plans, factoring in explainability and interpretability of algorithms, and how do you get your data back?
- aligning with new best practice and regulation new use cases and best practice are emerging monthly
- cost Al is not cheap! And getting it wrong could cost lots too.

### **Opportunities**

"Ensure a human stays in the loop with all Al implementations requiring decisions"

#### **Example AI tools:**

- instant content generation, summarisation, moderation & prompt engineering
- call recording, transcription & summarisation (eg contact centres) integrated with...
- workflow document/process management
- Al enabled digital workers eg chatbots
- code creation/software development

#### Potential outcomes from data & Al:

- bespoke & improved citizen services with a more holistic experience across channels
- increased business value and innovation
- increased momentum to legacy decommissioning
- enhanced risk management and prioritisation of deliverables
- more efficient, effective and faster decision making

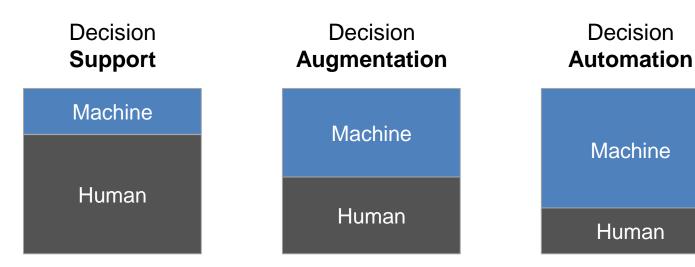

# Adopting decision automation

- data analytics & Al offers potential for significantly enhanced decision making
- level of human involvement required will vary by use case type

#### **Controls**

- contextualisation is key human judgement will remain essential for many situations
- data ethics must remain core to ensure robust and meaningful outcomes

#### **Considerations**

- reengineering decision-making challenges power - classical hierarchies are turned on their head
- removal of 'decision power' from designated grades is a significant culture shift

"Human-in-the-loop"

"Human-on-the-loop"

٧

"Human-in-command"

### Using AI in procurement

Al is expected to change the way many suppliers bid for public sector contracts and how contracting authorities operate.

- suppliers are already using Gen AI to write bids
- onus remains on the supplier to confirm the accuracy of bid contents
- for successful commercial outcomes, it remains imperative to assess capability and capacity
- increased volume of bids per procurement likely, as Gen AI removes barriers to some suppliers responding (eg SMEs)
- Al has potential to help contracting authorities optimise procurement & contract management processes, reducing costs & enhancing decision-making, for example through:
  - autonomous sourcing
  - contract redaction
  - predicting & forecasting
  - contract creation

**CCS** offers the UK Public Sector a range of commercial solutions to support with realising the opportunities and reducing the risks presented by **Data Analytics & Al** 

# The range of commercial agreements to consider

Framework Agreements	Dynamic Purchasing Systems
<ul> <li>range of buying options, including         Direct Award         prime suppliers fixed for framework term         rigorous evaluation and ongoing compliance (excludes GCloud)     </li> </ul>	<ul> <li>further competition only</li> <li>open to new supplier applications</li> <li>basic supplier compliance checks by CCS</li> </ul>
Big Data & Analytics	Artificial Intelligence
GCloud 13	Automation Marketplace
Technology Products & Associated Services 2 (TEPAS)	<u>SPARK</u>
Technology Services 3	
Back Office Software	
Cloud Compute 2	Crown Commercial Service

## Big data & analytics framework

- range of buying options & pricing mechanisms
- flexible call-off term up to five years
- 50 suppliers awarded across both lots

### LOT 1 - 'Design, Build & Run' professional services

Advance analytics & cognitive

Data risking

Data acquisition & management

Reporting & dashboard-ing

Platforms services

Search & discovery services

Government digital service agile development. stages

Discovery
Alpha
Beta
Live
Retirement

### LOT 2 - Commercial Off-the-Shelf (COTS) software

Big data management

search and discovery

Machine learning

Data mining and risking

Reporting and analytics

Services available

Licences

Support

Maintenance

Implementation

# Artificial intelligence DPS

- further competition only
- open to new supplier applications
- promotes Data Ethics
- bespoke terms for IPR

### **Capability Filters**

Scope of Engagement	Type of Al	Sector
<ul> <li>Al Discovery</li> <li>licencing, customisation and support</li> <li>end-to-end partnerships</li> </ul>	<ul> <li>Al applications</li> <li>augmented decision making</li> <li>data and analytics</li> <li>virtual assistants and chatbots</li> <li>medical Al technology</li> </ul>	<ul> <li>blue light</li> <li>central government</li> <li>devolved administrations</li> <li>health</li> <li>Local government</li> <li>Not-for-profit</li> </ul>

### Medical Al Technology

- screening
- diagnosis
- augmented decision making
- improving system efficiency

# Automation Marketplace DPS

- intelligent automation services & solutions, including automation technologies, services, consultancy & licences.
- further competition only
- open to new supplier applications

### **Capability Filters**

Design	Build	Live
<ul> <li>Business Strategy and Change Management</li> <li>Business Case Development</li> <li>Benefits Realisation</li> <li>Analytics - Clear overlap with 'Data and Analytics' in Al DPS</li> <li>Cloud Migration Strategy</li> <li>Automation Road mapping</li> </ul>	<ul> <li>Business Process         <ul> <li>Optimisation</li> </ul> </li> <li>Business Process</li></ul>	<ul> <li>Time and Materials Resource</li> <li>Training Packages for Educational Workshops</li> <li>Training In-House Capability with Digital Skills</li> <li>Workforce Training</li> <li>Coaching</li> </ul> License
<ul> <li>Customer Journey</li> <li>Setting up a Centre of Excellence (CoE)</li> </ul>	<ul> <li>Optical Character Recognition</li> <li>Computer Vision</li> <li>Computer Audition</li> <li>Text to Speech and Speech to Text</li> <li>Machine Learning</li> <li>Smart Workflow</li> <li>Analytics</li> </ul>	

### SPARK DPS

- further competition only
- open to new supplier applications

For buying emerging technology products and services, including IoT, AI and automation, simulated environments, wearables and new improvements in security.

Subject Area (Level 1 of 2)	Delivery Method (Level 1 of 2)
<ul> <li>corporate</li> <li>transport</li> <li>defence/security</li> <li>health</li> <li>local gov</li> <li>police/justice</li> <li>fire and rescue</li> <li>education</li> <li>geospatial</li> </ul>	<ul> <li>internet of things (IoT)</li> <li>Al and automation</li> <li>simulated and enhanced environments</li> <li>engineering/materials science</li> <li>data</li> <li>wearables</li> <li>transport</li> <li>security</li> </ul>

### Memorandum of Understanding

- centrally negotiated deals and terms for the public sector
- MoU savings can be accessed through any route to market

In addition to commercial agreements, CCS has signed a number of Memorandum of Understanding (MoU) with suppliers. These set out preferential pricing and discounts on products and services across the technology landscape, including cloud, software, technology products and services and networks.

### A request from CCS....

We want to understand the issues and impact and challenges you are seeing by the changes in its range of products and licence models - we are in discussion with VmWare direct on behalf of CO / HMG to minimise the impact on behalf of HMG
