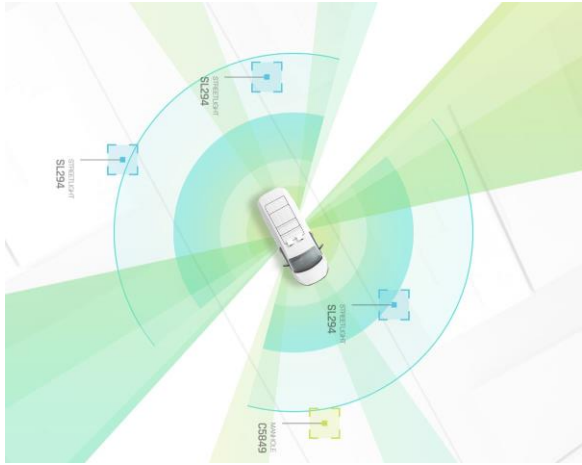
GAIST

- Bristol City Council have been using SafetyView since 2020
- BCC felt that the double entry of data from SafetyView into Confirm was reducing the potential efficiencies that SafetyView can provide
- Gaist and Confirm developed a 3 phase integration path to allow for a more streamlined process



Structures

- WSP updated all bridge inventory in Confirm
- Asset inspections completed
- Confirm provides asset scores
- Used in SAVi to understand depreciation value

SAVi Sustainable Asset Valuation

Public Enquiries

- Robust public reporting and response tool
- Run reports
- FOI and complaints
